SUMMARY

Detail-oriented and passionate Software Engineering Technology student at Centennial College with hands-on experience building responsive front-end applications and asynchronous REST API integrations. Possesses a strong foundation in JavaScript modern frameworks (React.js) and data management structures. Eager to leverage technical skills and problem-solving abilities in a Software Engineer Co-op/Internship role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, JSON

Frameworks & Libraries: React.js, React Router, Vite, CSS Grid

APIs & Data: REST APIs, Fetch API, Web Storage API, JSON Parsing

Tools & Methodologies: Git, GitHub, Agile/Scrum, Component-Driven Development

TECHNICAL PROJECTS

Dynamic Reactive Portfolio

React.js, CSS Grid, React Router, Vite

- Developed a highly customizable web portfolio shell utilizing React.js for dynamic, reactive component rendering.
- Configured seamless client-side navigation using React Router routines to enhance user experience.
- Optimized asset delivery and compilation speeds by structuring efficient Vite asset optimization loops.

Task Pipeline Engine

JavaScript ES6, Web Storage API

- Built a functional task-tracking grid designed to streamline daily operational workflows.
- Managed real-time operational data storage locally via active browser data structures and Web Storage API, ensuring data persistence across sessions.
- Leveraged modern JavaScript ES6 concepts to maintain clean, scalable, and modular codebases.

Meteorological Matrix API

JSON Parsing, Fetch REST API

- Engineered a live asynchronous web dashboard that visualizes real-time environmental metrics.
- Implemented remote network endpoints fetching mechanisms to request and process external environmental data.
- Utilized robust JSON parsing routines to transform incoming server responses into interactive UI elements.

EDUCATION

Centennial College – Toronto, ON

Sept 2024 – Present

Advanced Diploma in Software Engineering Technology

Expected Graduation: 2027

- **Relevant Coursework:** Object-Oriented Programming, Web Application Development, Database Concepts, Software Requirements Limit & Quality.
- **Activities:** Member of the Centennial College Tech/Coding Club.

SOFT SKILLS

- Strong team collaboration and communication skills refined through academic group projects.
- Adaptable learner with a proactive approach to mastering new software tools and frameworks.
- Analytical thinker focused on diagnosing and resolving logic bugs efficiently.
